

RUBIN K NJAGI

IN A NUT SHELL

Full-Stack Web Developer with Skills in the MEAN STACK(MONGO,EXPRESS, ANGULAR AND NODE JS).Played around with JAVA and mobile android development..

RECENT PROJECTS

Website Optimization | SojournKenya | JAN 2018

[Soujorn Kenya](#) a travel and tourism company contracted me to improve their website performance. The website had a load-time of 3.002 seconds. This contributed to a bounce rate of about 75%.

I optimized the website by implementing lazy-loading, server-side rendering, compressing most of the images, reducing the number of fonts and refactoring some of the angular code.

This reduced the load-time to 1.7seconds and a bounce rate of 53%.

Website Development | Brightside Rehab Center | DEC 2017

Contracted by brightside rehabilitation center to develop a [website](#) with the following Main features:

- Booking module
- Admin back-end
- Front-end

Fun Project | Video Sharing App |

Angular Based Video sharing app that allows users to register, share, view, rate and comment on videos.

CONTACTS

Would love to hear from you, feel free contact me to request more info about myself or my experience.
